

JARD Savage ® B Series Trigger System Installation Guide

*These instructions will help you install a
JARD Savage® B Series trigger system.*

Supplies needed for this installation:

- 1/4 Allen Wrench
- 5/32 Allen Wrench

1. Remove the magazine and visually inspect the chamber to ensure that the firearm is unloaded.

2. Remove the bolt by opening the bolt and holding the trigger down while pulling the bolt rearward.

3. Remove the 5/32" action screws and stock.

4. Remove 1/4" screws and remove factory trigger assembly.

Note: long screw in front | short screw in back

5. Align JARD trigger.

6. Start the front 1/4" screw BUT don't tighten, then start and tighten 1/4" back screw. Finish by tightening front screw.

7. Place stock back on and tighten 5/32" action screws.

8. Insert magazine and perform function and safety checks.
