WARNING

This firearm is intended for use only by experienced competitive shooters and professionals. You must take responsibility for your own actions. We will not be responsible for any loss, injury, or death resulting from the use or misuse of this product.

The handling and use of firearm bears with a certain unavoidable risks, like sky diving and rock climbing. If you are not willing to accept responsibility for your own actions, guns are not for you.

The use of any custom parts or modifications may void any warranty from the manufacturer of your firearm.

Returns will not be accepted on any parts that have been modified.

If you do not have a thorough understanding of the Jard AR Non-Adjustable Module Trigger and the purpose and function of all the parts, do not attempt to install this system. Have it installed by an experienced gunsmith.

JARD AR Non-Adjustable Module Replacement Trigger

Trigger Installation Instructions:

1. Remove the magazine and visually check the chamber before further handling the rifle, to verify it is not loaded
2. Remove the take down pins and separate the upper and lower assemblies.
3. Remove the pistol grip along with the safety, spring, and detent.
4. With a plastic mallet and drift, remove the trigger pins and original trigger components (a plastic mallet and drift will prevent damage to the receiver). The original pins will be used in the installation of the new system
5. Place the trigger assembly into the lower receiver, align and install the original trigger and hammer pins into the assembly.
6. Tighten down the retaining screws (8) clockwise until they are snug. Use blue thread locker on screws to ensure they do not loosen.

*Note: With the JARD Trigger System, the safety will be able to be engaged with the trigger decocked (hammer up). If the safety is engages with the trigger decocked, the firearm will not be able to be charged. Never attempt to charge the firearm with the trigger decocked and on the safe position.
